June 2022

Important Notice: Public Disclosure of HID Global Security Vulnerabilities

Dear Aero Partner,

HID Global is committed to open and transparent communication with our partners to ensure the continued long-term success of our business together. We were recently informed of cybersecurity vulnerabilities within firmware running on Aero X1100 Intelligent Controllers. We acted quickly to confirm and address all issues reported, validated fixes externally and are in the process of posting new firmware for our OEM partners to consume.

- Fixes will be available by the first full week in June 2022 for the X1100 (version 1.30.3)

At least one item fixed is considered critical. All boards should be patched immediately.

The vulnerabilities will be disclosed at the following conferences:

- [Hardwear.io conference](#), June 6-10, 2022
- [Blackhat conference](#), August 6-11, 2022

In communicating with partners and customers, please use the above summary for consistency with our joint messages to the market. HID Global values your continued business and the trust you place in our products. Should you have questions, please contact [HID Customer Support](#).

We thank you for your continued partnership.

Sincerely,
Product Marketing & Product Management
HID Physical Access Control Systems
